PROBLEM STATEMENT

In the Excel analysis shows Employee performance rating. In this analysis tell there are medium rated employees only more, others rating are not like that.

In the analysis the high and very high level rating is very low and low level rating is second place. We must improve this table.

WHO ARE THE END USERS?

OUR SOLUTION AND ITS VALUE PROPOSITION

- ▶ *Conditional formatting – missing*
- ▶ *Filter – remove*
- ▶ *Formula – Performance level*
- ▶ *Pivot Table – Summary*
- ▶ *Graph – Data visualization*

MODELLIN G

Data Collection

- 1) *Kaggle*
- 2) *edunet*
- 3) *Employee data set*

Feature Collection

- 1) *Employee Id*
- 2) *Employee type*
- 3) *Performance level etc..*

Analyze

- 1) *Pivot table*
- 2) *Graph*
- 3) *Slicer*

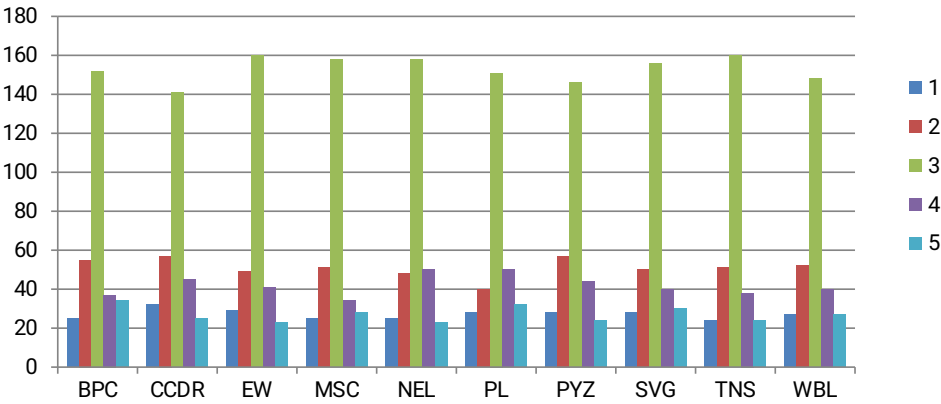

Editing

- 1) *Fonts*
- 2) *Filter*
- 3) *Highlight*
- 4) *Formulas*

conclusion

The analysis of employee performance ratings reveals that a majority of employees are rated at medium or low levels. This indicates that while a significant portion of the workforce meets basic expectations, there is room for improvement in achieving higher performance standards. Moving forward, the focus should be on targeted training, support, and motivation to elevate more employees to high-performance levels, thereby enhancing overall productivity and organizational success.
